

Chemistry

Minor: Chemistry, Chemistry Education

This program is designed to provide the student with a broad foundation in the fundamental principles of chemistry and to support other related fields of study, and the minor provides the student with additional depth in chemistry that employers prefer.

Students in this program complete CHEM 121/121L - General Chemistry I with Lab and CHEM 122/122L - General Chemistry II with Lab, plus 12 semester hours of chemistry electives to total a minimum of 20 semester hours. Teacher certification candidates are also required to complete EDUC 398 - Secondary Education Field Experience, EDUC 484 Secondary Methods for Science, and EDUC 426 - Reading in the Content Area.
