

# Hide Screenshot Toolbar

zoom  
Zen

When presenting to a mixed or hybrid audience, the Screenshot toolbar can hinder the experience for the audience attending in person. Now, you can hide the Screenshot toolbar so that it is not in the way!

When sharing your screen, click on the **More** button, then choose **Hide Floating Meeting Controls** to remove them for the field of view.

To get the toolbar back, use the **Escape** key on the keyboard.
