**Early Childhood Science Kit**
Students can explore science with hands-on activities. Practice measuring, balance, and much more!

**Early Childhood Look Out Tubes**
Students can look at the tubes and shake them to see what happens. Includes 6 small tubes and 5 large tubes.

**Early Childhood Touch and Feel**
Students can play the “What’s Inside?” game where they put their hand in and try to figure out what they are touching. They can also play with the different bags and see what is inside each bag!

**Early Childhood Magnetism Kit**
Students can explore magnetism with hands-on activities.

**Early Childhood Matching**
Students can categorize shapes according to shape, color, or size.
