Emerging Technologies Committee

Purpose:

The Emerging Technologies Committee (ETC) is an innovative "think tank" group, responsible for evaluating the effectiveness of and exploring innovative applications of current and emerging technologies to support the achievement of learning outcomes and delivery of course content. The ETC will periodically report progress and make recommendations to Technology Planning Committee (TPC) and the Vice President of Academic Affairs based on results of emerging instructional technologies. ETC members will use multiple resources (i.e. web conferences, journal articles, technology horizon reports, and technology meetings/conferences) to discover emerging technologies. When appropriate, this committee collaborates with other North Dakota University System (NDUS) campuses and with Core Technology Services (CTS)/Advanced Learning Technologies (ALT) office. Committee will periodically report progress and make recommendations to TPC and VPAA based on evaluation results of emerging instructional technologies.

Membership:

This committee will be comprised of three to five interested faculty members of the whole, Director of Extended Learning or designee, Director of Information Technology and Director of Instructional Design and Technology.

Meetings:

The Emerging Technology Committee shall meet at least four times per semester; except summers.

Adopted: August, 2015

Sponsor: Vice President for Academic Affairs
