

Student Location

For purposes of professional licensure disclosure compliance, Mayville State University determines student location and the time of student enrollment by the following means:

1. “Student location” is determined by the home address provided to Mayville State University and stored in the student’s record.
2. “Time of student enrollment” is that point at which a student is admitted to Mayville State University or at the time of a change in program of study to a licensure program.

Formal notification of a change in student location is effective on the date of revised home address. Formal notification of a change in program of study is effective at time of change in major to a licensure program.

If a student’s home address is not a U.S. State or territory, the student location is considered the state of North Dakota. If a student fails to notify Mayville State University of a change of address, or if mail to their home address is returned as undeliverable, their location is considered the state of North Dakota.

All other Mayville State University and North Dakota University System policies that determine residency for the purpose of tuition assessment are not superseded by this policy.

Adopted: July, 2024
